# Minimum Services

## Direct Cremation & Direct Burial

The Minimum Service charge represents the minimum non-declinable services required to facilitate the disposition of a deceased person by direct cremation or direct burial.

This minimum service charge is applicable to every family we serve and includes transferring the deceased from the place of death (or Coroner's Office, hospital, airport, etc.) to our holding room, where the deceased will be placed in a casket of your choosing and securely held until the necessary documentation is completed for cremation or burial. Once the required documentation is ready (ie., death has been registered and the Coroner's Certificate for cremation has been obtained), the deceased is transported in a service van or SUV to the crematorium at the earliest practicable opportunity, or at a scheduled time, as applicable.

Additional fees may apply for mileage beyond 25km, residential transfer requiring 2 staff and pacemaker/radioactive implant removal.

## What is NOT included in the Minimum Service Charge

---

### **What is NOT included in the above Minimum Services charge:**

- any supplies, such as a casket, urn, outer burial container, stationary, etc.

- applicable taxes (HST).

**\*Disbursements** to be paid to third parties on your behalf, such as the cemetery interment fee, crematorium fee, coroner's fee, death registration fee, etc. (as described on page 2).

# Casket Selections

## Minimum Requirements for a Casket:

The following caskets listed are those generally available. Additional options are available upon request. Unless otherwise noted, all caskets listed are standard adult size. **Oversized caskets are available for additional cost.**

**For burial:** The least expensive wood casket is suitable and is required by most cemeteries' by-laws for interment, in the interest of the health and safety of the workers involved in the interment process. A metal casket may also be used for burial. A growing number of cemeteries in Ontario offer "green" burials, which may consist of interment of a body without a casket. Since there is no legal definition for a "green" burial, it varies from one cemetery to another. For more information, please speak with one of our licensees or visit

[www.greenburialcanada.ca](http://www.greenburialcanada.ca).

**For cremation:** A body must be presented to the crematorium in a rigid, leak-proof casket that is made of a combustible material, such as wood or cardboard. Caskets containing non-flammable, hazardous material or chlorinated or fibre-reinforced plastic, other than incidental metal, cannot be used for cremation. We offer a selection of inexpensive caskets below that are suitable for cremation.

# Cremation Containers & Caskets
