Casket Selections

victoriaville & co

Minimum Requirements for a Casket:

The following caskets listed are those generally available. Additional options are available upon request. Unless otherwise noted, all caskets listed are standard adult size. **Oversized caskets are available for additional cost.**

For burial: The most basic wood casket meets cemetery requirements for burial and is often mandated by cemetery regulations to ensure the safety and health of those handling the interment. Metal caskets are also permitted for burial. Additionally, many cemeteries in Ontario now offer “green” burials, which may involve placing the body in the ground without a casket. Since there is no standardized legal definition of a green burial, practices can differ between cemeteries. For further details, please consult one of our licensed professionals or visit:

www.greenburialcanada.ca.

For cremation: For cremation, the deceased must be placed in a rigid, leak-resistant casket constructed from combustible materials such as wood or cardboard. Caskets that contain non-flammable or hazardous materials, or are made of chlorinated or reinforced plastics (aside from small amounts of metal), are not permitted. We provide a range of affordable caskets that are suitable for cremation.
